Greg,

As we discussed, attached are tables summarizing the sample and well information as well as the water quality measurements collected at each location (Table 1), and the preliminary analytical results (Table 2). Please let me know if you have any questions regarding either of these tables.

Thanks,

Dave

Hey Greg, hope you had a good weekend. Wanted to touch base and follow up on a few things with the Miller Response to see where we stand and what you're thinking moving forward:

- Did you get the information I sent about some waste broker options for the wastewater? Was any of that helpful
- As we discussed last week, I'll have some data tables summarizing the analytical results, location, water quality measurements, and well information (provided by the owner) prepared for you asap so that you can share information internally with your management and PADEP
- I don't want to jump the gun or rush you, but do you have any initial thoughts about collecting any additional samples from other wells in the area?
- We should be receiving final data packages later this week. As soon as we do we will forward to EAST for validation.
- Are you ok with putting in an amendment eventually to include the two additional labor categories (response specialist and GIS/mapping specialist), per the cost estimate I prepared for you last week?

I know you're probably busy with stuff, so feel free to respond at your convenience. I just wanted to make sure I got all of my thoughts out in an email before I get busy with Safety Light this week and potentially start forgetting things. Feel free to call me too if you want to talk and let me know if there's anything else you need, please.

Thanks,

Dave
